

GOVERNMENT & WORKFORCE RESILIENCE

Dashboard 4 Documentation

Documentation of the Power BI dashboard, its business questions, executive KPIs, DAX measures, and analytical purpose.

1. Project Overview

This dashboard focuses on the relationship between government AI policy, workforce resilience, AI adoption, workforce displacement, net workforce change, and reskilling. The dashboard is designed to evaluate whether stronger government policy frameworks are associated with more resilient workforce outcomes.

2. Executive Overview — KPI Measures

The Executive Overview uses the following measures to summarize government AI policy strength, workforce displacement, workforce outcomes, reskilling, and AI adoption.

1. Avg Government AI Policy Score

```
AVERAGE(ai_workforce_displacement[govt_ai_policy_score_1_to_10])
```

Purpose: Average government AI policy score.

2. Avg Workforce Displaced

```
AVERAGE(ai_workforce_displacement[pct_sector_workforce_displaced]) * 100
```

Purpose: Average percentage of workforce displaced.

3. Avg Net Workforce Change

```
AVERAGE(ai_workforce_displacement[net_workforce_change_pct]) * 100
```

Purpose: Average net workforce change percentage.

4. Avg Reskilling Programs

```
AVERAGE(ai_workforce_displacement[reskilling_programs_count])
```

Purpose: Average number of reskilling programs.

5. Avg AI Adoption

```
AVERAGE(ai_workforce_displacement[ai_adoption_index])
```

Purpose: Average AI adoption index.

3. Dashboard 4 — Government & Workforce Resilience

Purpose: examine how government AI policy frameworks relate to workforce displacement, net workforce outcomes, reskilling investment, and AI adoption.

Q1: Is stronger government AI policy associated with lower workforce displacement?

Visual: Policy Score vs. Workforce Displacement

Analytical Focus: Assess the relationship between government AI policy strength and workforce displacement.

Q2: Is stronger government AI policy associated with better net workforce outcomes?

Visual: Policy Score vs. Net Workforce Change

Analytical Focus: Evaluate whether stronger government AI policy is associated with more favorable net workforce outcomes.

Q3: Which countries have the strongest government AI policy frameworks?

Visual: Government AI Policy Score by Country

Analytical Focus: Compare government AI policy scores across countries and identify the strongest policy frameworks.

Q4: Is stronger government AI policy associated with greater reskilling investment?

Visual: Policy Score vs. Reskilling Programs

Analytical Focus: Examine the relationship between government AI policy strength and reskilling program activity.

Q5: How does government AI policy strength vary by income group?

Visual: Government AI Policy Score by Income Group

Analytical Focus: Compare average government AI policy scores across income groups.

Q6: Is higher AI adoption associated with stronger government AI policies?

Visual: AI Adoption vs. Government AI Policy Score

Analytical Focus: Assess the relationship between AI adoption and government AI policy strength.

Q7: Which countries combine high AI adoption, strong government policies, and positive workforce outcomes?

Visual: AI Adoption + Policy Score + Workforce Outcomes

Analytical Focus: Identify countries that combine high AI adoption with strong government policy, positive net workforce change, and workforce resilience indicators.

4. DAX Measures Summary

Measure	Calculation	Purpose
1. Avg Government AI Policy Score	AVERAGE	government AI policy score
2. Avg Workforce Displaced	AVERAGE × 100	percentage of workforce displaced
3. Avg Net Workforce Change	AVERAGE × 100	net workforce change percentage
4. Avg Reskilling Programs	AVERAGE	number of reskilling programs
5. Avg AI Adoption	AVERAGE	AI adoption index

5. Dataset Fields Used

Business Field	Dataset Column
Country	country
Income Group	income_group
AI Adoption	ai_adoption_index
Workforce Displaced	pct_sector_workforce_displaced

Net Workforce Change	net_workforce_change_pct
Reskilling Programs	reskilling_programs_count
Government AI Policy Score	govt_ai_policy_score_1_to_10
